Service information

- The older generations of foot controls [E0194...](#) and [E0759...](#) can be entirely replaced by the newest execution.
- In order to do so, choose the corresponding reference [E0777.R](#) (for alu platforms) or [E0777.V](#) (for steel platforms).
- The execution of the foot control may be influenced by other options occurring on the platform (platform lights, reed sensor, ...). Therefore, always mention the serial number of the tail lift upon ordering spare parts.
- The spare part codes [E0767.R](#) and [E0767.V](#) refer to newly built platforms from 2010 onwards. The codes [E0777.R](#) and [E0777.V](#) are repair sets, and are used to replace older generations of foot controls (see above).
